CONVECTION COOKING MODES

Consistent results with optimal heating temperatures

Fresh Pizza Mode

**No Preheat
Slow Cook**

**No Preheat
Air Fry**

FRESH PIZZA MODE

Create homemade, restaurant-style pizzas from the comfort of your kitchen. With higher temperatures (550°F), these settings allow customers to have a crispy crust and an even heat distribution throughout the dough. (*Preheating is required*)

NO PREHEAT SLOW COOK

Seal in flavors of juicy roasts, stews, and braised foods without the need for a countertop slow cooker. This cooking method is used to cook food slowly over a long period of time in an oven safe lidded pot. During this cycle, the bake and broil elements cycle on and off in intervals (while the fan circles the hot air when applicable, if there is convection) to ensure proper heat distribution.

Mode	Temperature	Time
Low	200 °F	12 hours
Medium	225 °F	8 hours
High	250 °F	4 hours

NO PREHEAT AIR FRY MODE

Let's you save time and skip preheating while you get crispy and browned food while using less oil than traditional deep frying. Dishwasher-safe basket sold separately (W11692811).

OTHER MODES (ON CONTROL PANEL)

Proofing bread, Air Broil, Keep Warm
