AND WOOD-FRONT RACKS**

Dimensions: h: 34.188" w: 23.875" d: 24"

Colors:  Stainless Steel

START THE CONVERSATION

Are you looking to store a specific type of beverage, like wine or soda, and where in your kitchen?

TOP FEATURES

1

FULLY FLUSH INSTALLATION WITH HIDDEN HINGES

provides a built-in look within a standard 24" base cabinet, so your style stands out, not the appliance. Hidden hinges allow the beverage center door to sit flush with surrounding cabinet fronts when closed yet easily swing open a full 115 degrees.

2

TWO TEMPERATURE-CONTROLLED ZONES

allow you to chill red and white wines between 42–64°F in the lower zone and keep sodas, seltzers and craft brews at colder temperatures in the upper zone, which adjusts from a low of 33°F for cold drinks up to 40°F for cheese and charcuterie.

3

TEMPERATURE MONITORING SYSTEM

uses sensors to monitor temperatures inside the beverage center for added peace of mind. If the system detects temperatures above 70°F for more than 4 hours, an over-temp alarm and indicator light will alert you that service is needed.

DID YOU KNOW?

Free Up Space in the Main Fridge: Beverages, especially larger bottles and cans, take up a lot of room. A separate beverage center frees up valuable space in the primary refrigerator for food.

HOW TO DEMONSTRATE

FULLY FLUSH INSTALLATION WITH HIDDEN HINGES

Open the beverage center and show what can fit in it.
